

GMSU

PRODUCT GUIDE

Productivity software for Discovery LC/MS laboratories.

Turn complex mass spectrometry data into clearer scientific decisions.

GMSU Console - focused utilities for Discovery analytical workflows

GUBBS Inc.

First Draft v0.5

Built around the way Discovery analytical laboratories work.

GMSU brings practical post-acquisition processing, chromatographic review, calculations, and reporting into a consistent scientist-focused environment.

01

Move through data faster

Review high-volume sample sets with workflows designed to reduce repetitive steps and keep critical information visible.

03

Custom Reports

With the click of a button, have your data reported in the exact format desired using your own Excel templates, eliminating copy/paste errors and drastically decreasing the amount of time to generate results.

02

Work across platforms

Use a consistent interface with supported Thermo Xcalibur and SCIEX Analyst data workflows.

04

Stay focused on Discovery

Use practical software designed to enhance productivity in Discovery analytical laboratories.

For pharmaceutical, biotechnology, and CRO Discovery teams that need focused tools without unnecessary complexity.

CORE CAPABILITIES

Review, evaluate, and interpret.

01

Generic Chromatographic Viewer

Review analyte and internal-standard chromatograms, integration, calculated values, and study context

02

Hepatic Clearance Calculator

Combine chromatography, time-point evaluation, regression, and calculate clearance parameters.

03

Microsoft Excel reporting

Generate reports directly from supported GMSU workflows.

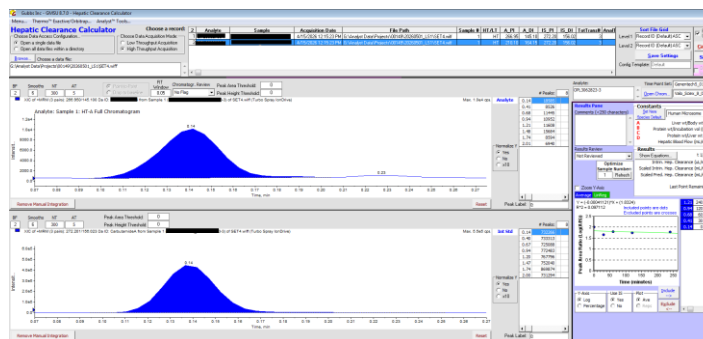

04

Scientist-focused navigation

Move efficiently through large sample sets using practical controls and displays.

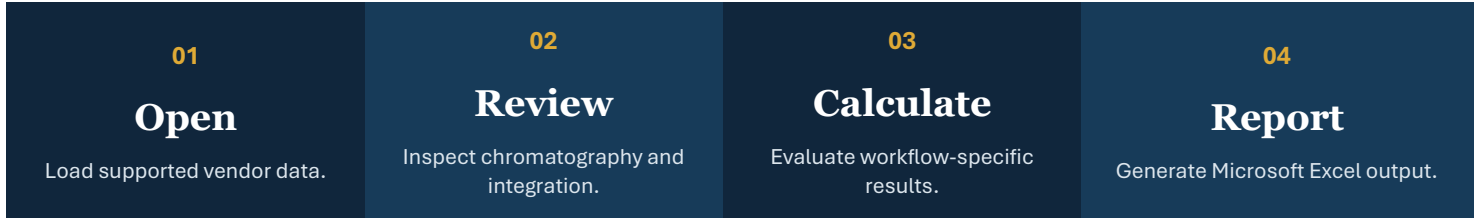

Generic Chromatographic Viewer - SCIEX Analyst data

Hepatic Clearance Calculator - integrated chromatographic and regression review

From acquired data to desired output.

GMSU supports a practical sequence that keeps analytical evidence, calculated results, and reporting connected.

CUSTOM REPORTING

Your desired Excel output - generated with one click.

Custom Excel reports can be purchased so that a customer's desired output can be generated with the click of a button rather than hours to days of error-prone manual copy-and-paste into Excel templates.

Gubbs works with customers to define the desired output and integrate the report into the applicable GMSU workflow.

SUPPORTED VENDOR PRODUCTS

A familiar review process across supported data environments.

Thermo Scientific

Xcalibur

SCIEX

Analyst

Compatibility statements apply only to the listed products.
